

We are a leading provider of Aeronautical Information Management (AIM), Aeronautical Message Handling (AMHS/CIDN/AFTN) Systems as well as Integrated Aerodrome Control Tower Systems.

In order to support the world-wide success of our innovative products, we are looking for a talented and motivated Java J2EE Developer to join a dynamic Spanish-German team. Participate in the creation of high-tech solutions and products in the fast growing and exciting environment of the aeronautical industry.

## Java J2EE Developer (m/f)

In your role as Software Developer, you will be responsible for the implementation of new requirements and new concepts driving your AIM product line.

You should be a highly enthusiastic person with good communication skills, a can-do attitude and a passion for technology. You should have a solid professional background (ideally gained in the aeronautical environment), speak English (German and Spanish are of advantage) and you need to be experienced with the following technologies:

- User Interface  
Java Web Start, Swing, JSP, Struts, Javascript, CSS, Ajax/DWR, JasperReports
- Business Logic  
J2EE, JMS, XML, Castor, Quartz
- Data Access  
JDBC, Hibernate, Hsqldb
- Products BEA  
Weblogic Server 8.1, Oracle 9i, Apache 2

The job location will be initially Madrid, Spain, for an on-the-job training during some months and then Konstanz/Friedrichshafen, Germany, as a main location with regular contacts with and trips to Madrid.

As an Investor in people this vacancy offers you a unique opportunity to join an expanding organization that prides itself on building brilliant IT solutions with other experts in a multi-cultural, international and highly rewarding working environment! Get in touch...
