

We are a leading provider of Aeronautical Information Management (AIM) Products and Systems that provide to civil and military aviation authorities world class capabilities to move from a product to data centred approach for making Aeronautical Static Data, Obstacle Data, Terrain Models, AIPs, FLIPs, and Charts available in electronic and paper format to airspace users.

We are looking for an Aeronautical Charting Specialist (Expert) to enhance our capability to provide charting services together with our systems deliveries and training.

Job Location: Frankfurt (Main) or Friedrichshafen, Germany
Employment Type: Full-Time Employment

Aeronautical Charting Expert & System Analyst (m/f)

Job Description & Responsibilities:

As an Aeronautical Charting Specialist you will generate electronic charts of all ICAO, NATO and other chart types. You will composite specifications for new to be designed electronic charts. Create images of generated or revised electronic design files. Create paper plots of those images. Performs edits on revised electronic design files. Make designated corrections noted against the revised electronic design file. Releases log boards in compliance with aeronautical regulatory standards or other rules. Create final images and transfer images to output devices.

You will evaluate regulatory documents from ICAO, CAAs and other bodies for chart specification changes and provide input to development departments. Planning and conducting aeronautical charting and tool usage training is also an essential part of your work.

As an ideal candidate you have:

- a high/secondary school diploma and degree in geography or related field,
- a degree in aviation related fields or the equivalent combination of education and experience,
- four or more years of related experience,
- ability to perform detailed orientated tasks combined with flexible working approach,
- good communication skills in verbal and written English are essential and a further language such as German would be an advantage.

Remuneration:
Basic according to skills and experience.
